Re: Chicago Public Schools - 2019 Three-Year Reinspections

Dear Mr. Glen:

GSG-Probe Consulting, Inc., Managing Environmental Consultant (MEC), conducted the Three-Year Reinspections and performed management plan updates for the Chicago Public Schools (CPS) facilities in Region 1, 2 Elementary Schools. Please update your records with the following information.

School District: 299 Unit: 24691 Region: 02 IDPH ID:14-016-2990-2375

School: Nobel School Building ID: 5110

Address: 4127 W. Hirsch Street

Chicago, IL, 60651

Building Contact: Contact Phone:

Current Building Owners: Chicago Public Schools

Review Date: 09/27/2019

Inspector: Joseph Hennigan Inspector IDPH License: 100-18350

Management Planner: Arturo Saenz Management Planner IDPH License: 100-04019

If you have any questions or comments, please contact us at 3123197575

Sincerely, GSG-Probe Consulting, Inc.

Arturo Saenz 100-04019

#### **Environmental Notification to Occupants**

To: Faculty, Staff and Parents From: Chicago Public Schools Date: September 24, 2019

RE: Nobel School, Unit 24691 4127 W. Hirsch Street Chicago, IL, 60651

Dear Faculty, Staff and Parents,

This letter is to notify you that the 2019 asbestos three year re-inspection has been completed at Nobel School, following the Federal Asbestos Hazard Emergency Response Act (AHERA), 40 CFR Part 763, Subpart E and is available for your review at the main office of the school.

Although asbestos-containing materials have been identified at Nobel School, there is no reason to believe that any threat to the health of students or staff exists at this time. CPS will continue to carefully monitor the condition of asbestos-containing materials and if conditions warrant, all appropriate steps will be taken to maintain the health and safety of all building occupants.

If you have any questions regarding this matter or require additional information, please feel free to contact Robert Christlieb, the designated Local Education Authority's Designated Person at (773) 553-3197.

#### II. EXECUTIVE SUMMARY

GSG-Probe Consulting, Inc. was retained by the Chicago Public Schools (CPS) to perform a three-year asbestos reinspection of the Nobel School. This inspection was conducted in accordance with the United States Environmental Protection Agency (USEPA) Asbestos Hazard Emergency Response Act (AHERA) part 763.85 (b), and the ongoing Operations and Maintenance Program (O&M) originally designed in the School's Asbestos Management Plan. The purpose of this three-year reinspection is to record any condition changes in the asbestos-containing building material (ACBM) in the school since the previous three-year reinspection and the six-month periodic surveillance, to identify, assess, and include any Homogeneous Areas(HA) not identified in the Management Plan, and to recommend an appropriate response action to manage asbestos.

The inspector conducted a three-year reinspection of this facility under Illinois Department of Public Health (IDPH) school reinspection requirements and AHERA, sections 763.85 and 763.88. The main building and each addition to the main building, if constructed at different dates, were inspected separately. Laboratory accreditations are included in Appendix C, laboratory results are included in Appendix D, and chain of custody forms are included in Appendix E.

Note: During previous inspections, some of the HA(s) were identified together as 9" x 9" floor tile (FT), mastics assoc. with 9" x 9" FT, 12" x 12" FT, mastics assoc. with 12" x 12" FT, pipe insulation, etc. Some of these HA(s) have been re-identified by areas that are uniform in color, texture, construction date, application date, and general appearance.

The inspector has determined the following:

A. The following HAs have changed assessment categories for Building 5110:

В.	The following new	nomogenous a	areas nave been	identified for	Building 5110:

Terrazzo

30

C. This reinspection covered only physically accessible and visible areas and materials that were identified in the LEA's management plan. The following materials were concealed and/or contained in areas that were inaccessible for sampling and have been classified as Assumed:

01	Hard Coat Plaster
03	12"x12" Tan, Brown & White Floor Tile
06	12"x12" Tan, Brown & White Floor Tile Mastic
09	9"x9" Beige Floor Tile Mastic
10	12"x12" Tan Floor Tile
11	12"x12" Tan Floor Tile Mastic
12	Red & Brown Linoleum
13	Red & Brown Linoleum Mastic
17	12"x12" Pink & Tan Floor Tile
18	12"x12" Pink & Tan Floor Tile Mastic
19	12"x12" Gray Floor Tile
21	12"x12" White Floor Tile
23	12"x12" White Ceiling Tile
24	12"x12" Blue Floor Tile
25	12"x12" Blue Floor Tile Mastic
26	Ceramic Tile Grout
27	Ceramic Tile Adhesive
28	12"x12" White Floor Tile
29	12"x12" White Floor Tile Mastic
30	Terrazzo

The following areas were deemed to be inaccessible:

Materials were also listed as "assumed" if they were in good condition and sampling was not conducted to avoid damage.

This reinspection was conducted by Joseph Hennigan, IDPH License # 100-18350. The Management Plan was updated by Arturo Saenz, IDPH License # 100-04019. Inspector and Management Planner Licenses are included in Appendix B.

#### III. METHODOLOGY

Tasks performed on-site included the following:

- 1. Review current management plan, identify HA(s) and extract appropriate information.
- 2. Examine and verify abatement records.
- 3. Touch and visually and physically reinspect and reassess the condition of all friable known or assumed ACBM.
- 4. Touchand visually and physically reinspect all non-friable known or assumed ACBM to determine whether these materials have become friable since the last inspection or periodic surveillance.
- 5. Identify any condition changes that may affect Hazard ranking of known ACBM or Assumed ACBM, as well as any HA(s) that have become friable since the last reinspection.
- 6. Collect bulk samples from each newly discovered friable HA or previously assumed and submit for laboratory analysis.
- 7. Tabulate reinspection findingsand submit for management planner review and recommendations with appropriate response actions based on the AHERA Damage Category of the ACBM.
- 8. Submit reinspection findings and management planner recommendations to the LEA within thirty (30) days for inclusion into the management plan.

#### IV. ABATEMENT HISTORY

The information collected from the existing management plan and inspection report(s) and from interviews with the school official revealed that the following asbestos abatement was conducted at the school since the previous Three year Reinspection.

#### **Abatement Dates:**

#### V. REASSESSMENTS AND RECOMMENDATIONS

The reassessments and recommendations are summarized in Tables I and II on the following pages. Detailed Hazard Assessment Sheets and Drawings and Photos (if applicable) are included in Appendix A.

#### VI. CONCLUSIONS

The Nobel School Building 5110 Three-Year reinspection has been completed and response actions have been recommended for both friable and non-friable materials. Atimely execution of the response actions recommended will enable the LEA and the Designated Person(s) to effectively manage the existing ACBM.

This three-year reinspection report should be inspected in the current Management plan at the CPS Central Office, and one (1) copy should be kept at the school for use when planning any renovation and/or demolition activities in areas where ACBM has been identified. Also, periodic surveillance documentation and any summary reports from any response actions that are executed at the school should be used to update the Management Plan.
