Environmental Notification to Occupants

To: Faculty, Staff and Parents From: Chicago Public Schools Date: October 22, 2019

RE: Volta School, Unit 25681 4950 N Avers Avenue Chicago, IL, 60625

Dear Faculty, Staff and Parents,

This letter is to notify you that the 2019 asbestos three year re-inspection has been completed at Volta School, following the Federal Asbestos Hazard Emergency Response Act (AHERA), 40 CFR Part 763, Subpart E and is available for your review at the main office of the school.

Although asbestos-containing materials have been identified at Volta School, there is no reason to believe that any threat to the health of students or staff exists at this time. CPS will continue to carefully monitor the condition of asbestos-containing materials and if conditions warrant, all appropriate steps will be taken to maintain the health and safety of all building occupants.

If you have any questions regarding this matter or require additional information, please feel free to contact Robert Christlieb, the designated Local Education Authority's Designated Person at (773) 553-3197.

II. EXECUTIVE SUMMARY

GSG-Probe Consulting, Inc. was retained by the Chicago Public Schools (CPS) to perform a three-year asbestos reinspection of the Volta School. This inspection was conducted in accordance with the United States Environmental Protection Agency (USEPA) Asbestos Hazard Emergency Response Act (AHERA) part 763.85 (b), and the ongoing Operations and Maintenance Program (O&M) originally designed in the School's Asbestos Management Plan. The purpose of this three-year reinspection is to record any condition changes in the asbestos-containing building material (ACBM) in the school since the previous three-year reinspection and the six-month periodic surveillance, to identify, assess, and include any Homogeneous Areas(HA) not identified in the Management Plan, and to recommend an appropriate response action to manage asbestos.

The inspector conducted a three-year reinspection of this facility under Illinois Department of Public Health (IDPH) school reinspection requirements and AHERA, sections 763.85 and 763.88. The main building and each addition to the main building, if constructed at different dates, were inspected separately. Laboratory accreditations are included in Appendix C, laboratory results are included in Appendix D, and chain of custody forms are included in Appendix E.

Note: During previous inspections, some of the HA(s) were identified together as 9" x 9" floor tile (FT), mastics assoc. with 9" x 9" FT, 12" x 12" FT, mastics assoc. with 12" x 12" FT, pipe insulation, etc. Some of these HA(s) have been re-identified by areas that are uniform in color, texture, construction date, application date, and general appearance.

The inspector has determined the following:

A. The following HAs have changed assessment categories for Building 6270:

3. The following	ng new homo	genous areas	s have been	identified f	or Building 6	3270:	

C. This reinspection covered only physically accessible and visible areas and materials that were identified in the LEA's management plan. The following materials were concealed and/or contained in areas that were inaccessible for sampling and have been classified as Assumed:

03	12"x12" White Vinyl Floor Tile
03A	12"x12" White Vinyl Floor Tile Mastic
04	12"x12" Red Vinyl Floor Tile
09	12"x12" White w/ Black Speckles VFT
10	12"x12" White w/ Pink Speckles Vinyl Floor Tile
10A	12"x12" White w/ Pink Speckles VFT Mastic
11	12"x12" Black w/ White Speckles Vinyl Floor Tile
11A	12"x12" Black w/ White Speckles VFT Mastic
12	12"x12" Peach Vinyl Floor Tile
12A	12"x12" Peach Vinyl Floor Tile Mastic
15	9"x9" Beige w/ White Speckles Vinyl Floor Tile
15A	9"x9" Beige w/ White Speckles VFT Mastic
16	9"x9" Dark Beige w/ White & Brown Speckles VFT
17	12"x12" Peach w/ White Streaks VFT
17A	12"x12" Peach w/ White Streaks VFT Mastic
19	12"x12" Gray VFT
20	12"x12" Gray VFT Mastic
21	2'x4' White Ceiling Tile
22	Vinyl Baseboard
23	Vinyl Baseboard Mastic
24	Drywall
25	Drywall Joint Compound
26	Terrazzo
27	Decorative Plaster
28	Carpet Mastic
29	Fire Doors
30	Decorative Plaster
31	12"x12" White w/ Light Gray and Gray Streaks VFT
31A	12"x12" White w/ Light Gray and Gray Streaks VFT
	Mastic

The following areas were deemed to be inaccessible:

02A 9"x9" Light Brown Vinyl Floor Tile Mastic

Materials were also listed as "assumed" if they were in good condition and sampling was not conducted to avoid damage.

This reinspection was conducted by Esteban Nunez, IDPH License # 100-11255. The

Management Plan was updated by Jigar Shah, IDPH License # 100-07342. Inspector and Management Planner Licenses are included in Appendix B.

III. METHODOLOGY

Tasks performed on-site included the following:

- 1. Review current management plan, identify HA(s) and extract appropriate information.
- 2. Examine and verify abatement records.
- 3. Touch and visually and physically reinspect and reassess the condition of all friable known or assumed ACBM.
- 4. Touchand visually and physically reinspect all non-friable known or assumed ACBM to determine whether these materials have become friable since the last inspection or periodic surveillance.
- 5. Identify any condition changes that may affect Hazard ranking of known ACBM or Assumed ACBM, as well as any HA(s) that have become friable since the last reinspection.
- 6. Collect bulk samples from each newly discovered friable HA or previously assumed and submit for laboratory analysis.
- 7. Tabulate reinspection findings and submit for management planner review and recommendations with appropriate response actions based on the AHERA Damage Category of the ACBM.
- 8. Submit reinspection findings and management planner recommendations to the LEA within thirty (30) days for inclusion into the management plan.

IV. ABATEMENT HISTORY

The information collected from the existing management plan and inspection report(s) and from interviews with the school official revealed that the following asbestos abatement was conducted at the school since the previous Three year Reinspection.

Abatement Dates:

V. REASSESSMENTS AND RECOMMENDATIONS

The reassessments and recommendations are summarized in Tables I and II on the following pages. Detailed Hazard Assessment Sheets and Drawings and Photos (if applicable) are included in Appendix A.

VI. CONCLUSIONS

The Volta School Building 6270 Three-Year reinspection has been completed and response actions have been recommended for both friable and non-friable materials. Atimely execution of the response actions recommended will enable the LEA and the Designated Person(s) to effectively manage the existing ACBM.

This three-year reinspection report should be inspected in the current Management plan at the CPS Central Office, and one (1) copy should be kept at the school for use when planning any renovation and/or demolition activities in areas where ACBM has been identified. Also, periodic surveillance documentation and any summary reports from any response actions that are executed at the school should be used to update the Management Plan.
