

Nutrition Support Point of Sale System

Project Summary

Project Type: Nutrition Support Point of Sale System
Department: Nutrition Support
Status: Planning
Unit Number: 12050

Budget Amount: \$8,500,000
Budget Year: 2013
Estimated Project Start: June 2013
Estimated Project Complete: June 2014

The proposed CPS district-wide Point-of-Sale System (POS) is a software suite that will allow students to pay for meals using an electronic debit card, eliminating the need for students to carry cash. The software also provide students and families with online meal applications, online payment refills, access to a student's meal history, and online meal menus along with nutritional information. In addition to the community benefits, the new system provides the district with greater cash control and regulatory reporting efficiencies.

Financial Details

Table with 2 columns: Project Phase, Original Budget. Rows include Equipment, Services, Software, Project Total. A separate box contains summary metrics: Current Estimate (\$8,500,000), Expenditure to Date (\$0), Percent Complete (0%), Funding Source (CPS Resources), Operating Impact (\$4,000,000).

Details

Scope

The integrated system consists of many food service related software modules and will provide district-wide availability of meal/financial data in real-time.

- The system will provide online access to meal applications
•The system will provide online access to collect payments from parents/adults
•The system will provide online access to students meal history, online meal menus along with nutritional information

The POS system includes the following modules:

Online Meal Applications, Online Payment, Point of Service (POS), Menu Planning and Nutrition Analysis, Reporting and Reimbursement Management, Inventory Management, Catering Management, Sending and Receiving School Management, Temp Staff Management, Production Log and Work-Order/Asset Management
