Re: Chicago Public Schools - 2025 Three-Year Reinspections

Dear Mr. Culbertson:

TEM Environmental, Inc., Managing Environmental Consultant (MEC), conducted the Three-Year Reinspections and performed management plan updates for the Chicago Public Schools (CPS) facilities in Region 5, 6 Elementary Schools. Please update your records with the following information.

School District: 299                      Unit: 24871                      Region: 05                      IDPH ID: 14-016-2990-2200

School: Peck School PreK                      Building ID: 5340 PreK

Address: 4026 W 59th St.

Chicago, IL, 60629

Building Contact: Hett, Daniel

Contact Phone: 7737107820

Current Building Owners: Chicago Public Schools

Reinspection Date: 5/8/2025

Review Date:

Inspector: Anthony Porfilio

Inspector IDPH License: 100-20974

Management Planner:

Management Planner IDPH License:

If you have any questions or comments, please contact us at 630-790-0880

Sincerely,  
TEM Environmental, Inc.

## **Environmental Notification to Occupants**

To: Faculty, Staff and Parents  
From: Chicago Public Schools  
Date:

RE: Peck School PreK, Unit 24871  
4026 W 59th St.  
Chicago, IL, 60629

Dear Faculty, Staff and Parents,

This letter is to notify you that the 2025 asbestos three year re-inspection has been completed at Peck School PreK , following the Federal Asbestos Hazard Emergency Response Act (AHERA), 40 CFR Part 763, Subpart E and is available for your review at the main office of the school.

Although asbestos-containing building materials have been identified at Peck School PreK, there is no reason to believe that any threat to the health of students or staff exists at this time. CPS will continue to carefully monitor the condition of asbestos-containing building materials and if conditions warrant, all appropriate steps will be taken to maintain the health and safety of all building occupants.

If you have any questions regarding this matter or require additional information, please feel free to contact , the designated Local Education Authority's Designated Person at .

Name:

## II. EXECUTIVE SUMMARY

TEM Environmental, Inc. was retained by the Chicago Public Schools (CPS) to perform a three-year asbestos reinspection of the Peck School PreK. This inspection was conducted in accordance with the United States Environmental Protection Agency (USEPA) Asbestos Hazard Emergency Response Act (AHERA) part 763.92 (b), and the ongoing Operations and Maintenance Program (O&M) originally designed in the School's Asbestos Management Plan. The purpose of this three-year reinspection is to record any condition changes in the asbestos-containing building material (ACBM) in the school since the previous three-year reinspection and the six-month periodic surveillance, to identify, assess, and include any Homogeneous Areas (HA) not identified in the Management Plan, and to recommend an appropriate response action to manage asbestos.

The inspector conducted a three-year reinspection of this facility under Illinois Department of Public Health (IDPH) school reinspection requirements and AHERA, sections 763.85 and 763.88. The main building and each addition to the main building, if constructed at different dates, were inspected separately. Laboratory accreditations are included in Appendix C, laboratory results are included in Appendix D, and chain of custody forms are included in Appendix E.

Note: During previous inspections, some of the HA(s) were identified together as 9" x 9" floor tile (FT), mastics assoc. with 9" x 9" FT, 12" x 12" FT, mastics assoc. with 12" x 12" FT, pipe insulation, etc. Some of these HA(s) have been re-identified by areas that are uniform in color, texture, construction date, application date, and general appearance.

The inspector has determined the following:

A. The following HAs have changed assessment categories for Building 5340 PreK:

7	Drywall
8	Drywall Joint Compound
9	2'x4' Plain White Ceiling Tile
NEW	Newly Installed Suspect ACM

B. The following new homogenous areas have been identified for Building 5340 PreK:

C. This reinspection covered only physically accessible and visible areas and materials that were identified in the LEA's management plan. The following materials were concealed and/or contained in areas that were inaccessible for sampling and have been classified as Assumed:

1	12x12 White w/Blue, Red & Yellow Specks Vinyl Floor Tile
2	12x12 White w/Blue, Red & Yellow Specks Vinyl Floor Tile Mastic
3	2'x4' Pebble Ceiling Tile
4	White Vinyl Baseboard
5	White Vinyl Baseboard Adhesive
6	Metal Pan Ceiling Above 2X4 Ceiling
7	Drywall
8	Drywall Joint Compound
9	2'x4' Plain White Ceiling Tile
NEW	Newly Installed Suspect ACM

The following areas were deemed to be inaccessible:

2	12x12 White w/Blue, Red & Yellow Specks Vinyl Floor Tile Mastic
5	White Vinyl Baseboard Adhesive

Materials were also listed as "assumed" if they were in good condition and sampling was not conducted to avoid damage.

This reinspection was conducted by Anthony Porfilio, IDPH License # 100-20974. The Management Plan was updated by , IDPH License # . Inspector and Management Planner Licenses are included in Appendix B.

### **III. METHODOLOGY**

Tasks performed on-site included the following:

1. Review current management plan, identify HA(s) and extract appropriate information.
2. Examine and verify abatement records.
3. Touch and visually and physically reinspect and reassess the condition of all friable known or assumed ACBM.
4. Touch and visually and physically reinspect all non-friable known or assumed ACBM to determine whether these materials have become friable since the last inspection or periodic surveillance.
5. Identify any condition changes that may affect Hazard Ranking of known ACBM or Assumed ACBM, as well as any HA(s) that have become friable since the last reinspection.
6. Collect bulk samples from each newly discovered friable HA or previously assumed and submit for laboratory analysis.
7. Tabulate reinspection findings and submit for management planner review and recommendations with appropriate response actions based on the AHERA Damage Category of the ACBM.
8. Submit reinspection findings and management planner recommendations to the LEA within thirty (30) days for inclusion into the management plan.

### **IV. ABATEMENT HISTORY**

The information collected from the existing management plan and inspection report(s) and from interviews with the school official revealed that the following asbestos abatement was conducted at the school since the previous Three year Reinspection.

Abatement Dates:

### **V. REASSESSMENTS AND RECOMMENDATIONS**

The reassessments and recommendations are summarized in Tables I and II on the following pages. Detailed Hazard Assessment Sheets and Drawings and Photos (if applicable) are included in Appendix A.

### **VI. CONCLUSIONS**

The Peck School PreK Building 5340 PreK Three-Year reinspection has been completed and response actions have been recommended for both friable and non-friable ACBM. A timely execution of the response actions recommended will enable the LEA and the Designated Person(s) to effectively manage the existing ACBM.

This three-year reinspection report should be inserted in the current Management plan at the CPS Central Office, and one (1) copy should be kept at the school for use when planning any renovation and/or demolition activities in areas where ACBM has been identified. Also, periodic surveillance documentation and any summary reports from any response actions that are executed at the school should be used to update the Management Plan.
