## II. EXECUTIVE SUMMARY

TEM Environmental, Inc. was retained by the Chicago Public Schools (CPS) to perform a three-year asbestos reinspection of the Evers School. This inspection was conducted in accordance with the United States Environmental Protection Agency (USEPA) Asbestos Hazard Emergency Response Act (AHERA) part 763.92 (b), and the ongoing Operations and Maintenance Program (O&M) originally designed in the School's Asbestos Management Plan. The purpose of this three-year reinspection is to record any condition changes in the asbestos-containing building material (ACBM) in the school since the previous three-year reinspection and the six-month periodic surveillance, to identify, assess, and include any Homogeneous Areas (HA) not identified in the Management Plan, and to recommend an appropriate response action to manage asbestos.

The inspector conducted a three-year reinspection of this facility under Illinois Department of Public Health (IDPH) school reinspection requirements and AHERA, sections 763.85 and 763.88. The main building and each addition to the main building, if constructed at different dates, were inspected separately. Laboratory accreditations are included in Appendix C, laboratory results are included in Appendix D, and chain of custody forms are included in Appendix E.

Note: During previous inspections, some of the HA(s) were identified together as 9" x 9" floor tile (FT), mastics assoc. with 9" x 9" FT, 12" x 12" FT, mastics assoc. with 12" x 12" FT, pipe insulation, etc. Some of these HA(s) have been re-identified by areas that are uniform in color, texture, construction date, application date, and general appearance.

The inspector has determined the following:

A. The following HAs have changed assessment categories for Building 7990:

40	12"X12" Sky Blue Floor Tile
40M	Mastic associated w/12"x12" Sky Blue Floor Tile
41	12"X12" White Floor Tile
41M	Mastic associated w/12"x12" White Floor Tile
42	12"x12" Teal Green Floor Tile
42M	Mastic associated w/12"x12" Teal Green Floor Tile
43	4" Grey Baseboard & associated Adhesive
NEW	Newly Installed Suspect ACM

B. The following new homogenous areas have been identified for Building 7990:

40	12"X12" Sky Blue Floor Tile
40M	Mastic associated w/12"x12" Sky Blue Floor Tile
41	12"X12" White Floor Tile
41M	Mastic associated w/12"x12" White Floor Tile
42	12"x12" Teal Green Floor Tile
42M	Mastic associated w/12"x12" Teal Green Floor Tile
43	4" Grey Baseboard & associated Adhesive

C. This reinspection covered only physically accessible and visible areas and materials that were identified in the LEA's management plan. The following materials were concealed and/or contained in areas that were inaccessible for sampling and have been classified as Assumed:

04F	1'x1' Ceiling Tile and Adhesive (Six 4'x8' Panels on the Wall)

The following areas were deemed to be inaccessible:

26	Gray, Green, Blue (Scattered Pattern) Carpet
----	--

	Adhesive
27	Blue Carpet Adhesive NOT OBSERVED
28	Gray Carpet Adhesive
29	Red Carpet Adhesive
D	12"X12" White Vinyl Floor Tile Mastic

Materials were also listed as "assumed" if they were in good condition and sampling was not conducted to avoid damage.

This reinspection was conducted by Mona Rogers, IDPH License # 100-19136. The Management Plan was updated by Steven Geneser, IDPH License # 100-01784. Inspector and Management Planner Licenses are included in Appendix B.

### **III. METHODOLOGY**

Tasks performed on-site included the following:

1. Review current management plan, identify HA(s) and extract appropriate information.
2. Examine and verify abatement records.
3. Touch and visually and physically reinspect and reassess the condition of all friable known or assumed ACBM.
4. Touch and visually and physically reinspect all non-friable known or assumed ACBM to determine whether these materials have become friable since the last inspection or periodic surveillance.
5. Identify any condition changes that may affect Hazard Ranking of known ACBM or Assumed ACBM, as well as any HA(s) that have become friable since the last reinspection.
6. Collect bulk samples from each newly discovered friable HA or previously assumed and submit for laboratory analysis.
7. Tabulate reinspection findings and submit for management planner review and recommendations with appropriate response actions based on the AHERA Damage Category of the ACBM.
8. Submit reinspection findings and management planner recommendations to the LEA within thirty (30) days for inclusion into the management plan.

### **IV. ABATEMENT HISTORY**

The information collected from the existing management plan and inspection report(s) and from interviews with the school official revealed that the following asbestos abatement was conducted at the school since the previous Three year Reinspection.

Abatement Dates: 7/11/2022

### **V. REASSESSMENTS AND RECOMMENDATIONS**

The reassessments and recommendations are summarized in Tables I and II on the following pages. Detailed Hazard Assessment Sheets and Drawings and Photos (if applicable) are included in Appendix A.

### **VI. CONCLUSIONS**

The Evers School Building 7990 Three-Year reinspection has been completed and response actions have been recommended for both friable and non-friable ACBM. A timely execution of the response actions recommended will enable the LEA and the Designated Person(s) to effectively manage the existing ACBM.

This three-year reinspection report should be inserted in the current Management plan at the CPS Central Office, and one (1) copy should be kept at the school for use when planning any renovation and/or demolition activities in areas where ACBM has been identified. Also, periodic surveillance documentation and any summary reports from any response actions that are executed at the school should be used to update the Management Plan.
