

Facility Assessment Report

This report contains the detailed findings of the facility condition assessment completed on the date noted in the document footer. Assessors rate each facility item by visual observation only; they do not test the operation of equipment or perform destructive testing of walls, ceilings, or floors. Each facility item is ranked on a 7-point scale: a rank 7 means the item is new or in like-new condition and no work is required while rank 1 means the item has failed and has led to an immediate life safety condition¹. The remaining ranks generally mean that the item requires regular maintenance (rank 5 or 6) or full replacement (rank 2, 3 or 4). To enhance reporting and capital planning analysis, each assessed item must also be assigned a recommended replacement range (used to specify the time span, in years, before replacement is recommended). Definitions for Quantity and Unit of Measure (UOM) can be found at the end of this report.

For additional detail and definition on rank values as they relate to each assessed item or the recommended replacement range, please visit the "CPS Guide to Biennial Facility Assessments" found on the Facilities Standards webpage under CPS Policies and Guidelines at <http://www.cps.edu/facilityassessment>.

	PA System	Entire Building	11,488	SF	4	0-1 year	Served by Main and Addition 3. PA console is located in Room 104 of Main with announcements, paging and individual classroom communication based in the Addition 3 school office. Older system that employs antiquated (30-plus-year-old) technology, causing generally unclear communications within all spaces of the school, especially Main, Addition 1 and Addition 2 which have much older transmission and receiving equipment. Rank, Reason and Priority Rep changed due to the safety issue that exists when emergency communications are unable to be exchanged and the risk of personal injury that could occur as a result.

Main Service

	PA System	Entire Building	17,483	SF	4	0-1 year	Served by Main and Addition 3. PA console is located in Room 104 of Main with announcements, paging and individual classroom communication based in the Addition 3 school office. Older system that employs antiquated (30-plus-year-old) technology, causing generally unclear communications within all spaces of the school, especially Main, Addition 1 and Addition 2 which have much older transmission and receiving equipment. Rank, Reason and Priority Rep changed due to the

¹ It is very rare for assessors to find a feature in this condition. If assessors do, they are required to report it to CPS right away, and CPS facilities will address it immediately. As a result, no features should be ranked "1" in this report; by the time the report is compiled, they will have been resolved.

Definitions

- **Quantity** means, for each item, the total number (or amount) of that item that exists and was evaluated
- **Unit** means the generally accepted standard unit of measure for each item. Some items, like doors, are measured individually and use the unit of measurement "EA" for "each." Other items, like chimneys, are measured in terms of linear feet ("LF"). Still other items, like flooring, are generally measured in square feet ("SF").
