my name is Noemi Garcia & I have lived in my community for over 25 years, I believe that Intrinsic School on Belmont has been such a great addition to all the students of our area.

Although my children are very young and years away from 7th grade. I will definitely be looking to enroll them once they need Intrinsic. I have seen all the amazing work being done there.

I not only am impressed by the curriculum being taught there, but by the teachers pushing the children to learn & achieve all they can, by using all their potential. I also was thrilled to see all of the diverse clubs & sports being offered to the students. I firmly believe that programs like this help kids stay motivated, well-rounded & keep them disciplined. Not only is the school a beautiful building outside & inside, with the latest technology, which I think the kids benefit greatly from. I know kids who have attended, graduated & are currently enrolled there, they speak so highly of the teachers, their classes, their soccer field, they enjoy it all. I have seen first hand this school push kids who were once not concerned with grades & school, get them right back on track. Making huge strides with these students is what I believe that schools like Intrinsic are. so needed in our communities.

To Whom It May Concern,

Every family holds different values of what is important to them. In my family, the most important values we hold are respect and prosperity. Intrinsic Schools has demonstrated that my family values are to be upheld and that is why Intrinsic Schools would be the best fit for my child.

Respect is something that can be shown between people or between institutions and people. Intrinsic has shown respect as an institution by providing community events and outreach programs. Having community involvement would allow my child the opportunity of understanding what service means and how we all gain from serving our communities. Outreach programs provided to the public by Intrinsic allow for networking opportunities, which is how I became aware of the gold mine in my neighborhood.

Prosperity is a value most hold dear because it allows for growth mentally and financially. Intrinsic Schools have high school counselors that individualize academic success for students. I've heard so many success stories of students going to college with little or no student loans. I would love for my child to be apart of this success rate. Ultimately, having my child going to Intrinsic Schools would make the world of difference to their future career.

Sincerely,

To Whom It May Concern:

I am writing this letter of support for the opening of a second campus of an Intrinsic School. As a parent of a prospective Intrinsic student, I believe that the school embodies the best principles of education. The transformative power of the curriculum lies in its ability to help students understand the possibilities of the future, ideas, which otherwise would have been learned. The curriculum allows students to imagine the future, both personally and professionally, in ways that empower each individual to change the future for the better.

Having had the opportunity to see the impact Intrinsic has had on a student, particularly in that of my niece; I have witnessed how the school has opened doors and permitted her to begin a journey of exploration and realization of what is possible, in her educational and prospective professional career.

I strongly believe that Intrinsic's impact is at the heart of what has helped its students achieve their potential. And the first step is helping them realize that what seemed to be locked is only closed and can be opened by their own efforts. I hope that you will invest in the future of our community by opening a second campus, which will deliver a learning experience achievable through the Intrinsic experience.

Sincerely,

To Whom It May Concern:

To choose a school for your child becomes a priority, but a much greater priority when college is in the near future. Intrinsic Schools gives kids a broader scope of learning styles. Teaching methods also include technology that goes beyond the education given by the teacher, a reinforcement, if you will. Education that goes beyond even the classroom and beyond high school is a goal of the school.

These unique elements—technology and helping kids plan for after high school—is why I would send my children to Intrinsic Schools. This is why the school is a strong choice for my children. I really hope to see Intrinsic Schools not only in school but across states.

Thank you,
Julianna Garcia

Intrinsic is an incredible, unique and innovative school. There are so many different kinds of people that each brings something really special to contribute to the school.

Students are not just a number at Intrinsic. The teachers know and care about a student's progress and students can easily communicate with the teachers. Intrinsic has always helped students succeed!

Intrinsic also offers a wide range of opportunities (academics, athletics, clubs) for students to get involved in. Intrinsic is very innovative in terms of offering students different ways to learn along with smaller class sizes where there is more flexibility in the ways classes are taught.

Intrinsic should be the model for today's modern classroom as it has definitely carved the path for the future!

Intrinsic provides a very unique learning experience when compared to other local Chicago high schools. From the facilities to the faculty, Intrinsic provides an overall learning experience. Not just the same old classroom learning we all grew up with. They take an innovative approach to learning and it really shows every day when you're part of the Intrinsic family. Chalked full of engaged teachers, advisors, technology, and most importantly students that want to experience learning in new ways.

Intrinsic also has a full array of options and programs that prepare their students for life after high school. From academic programs to technology exposure, parents can truly feel confident that their young adults will be ready for whatever life has to offer them. Whether it's preparing them for college or careers Intrinsic has everything a young, knowledge-thirsty mind could ever want.

To Whom It May Concern:

I am writing because my husband and I believe that education is one of the keys to success. Another key to success comes from the ambition to meet goals. At Intrinsic Schools, children are provided with ways in which education leads a child to find his or her ambition with use of a holistic teaching style and use of technology in each course.

It is because of the teaching techniques and technology that I would send my children to Intrinsic Schools in the near future. To know that my children would be supported by this school's goals to ensure that plans are in place for beyond high school is why Intrinsic Schools is number one on our list.

Thank you for your time.

Sincerely,

To whom it may concern,

Hello, my name is Maria Nolasco and I believe that the concept of a second Intrinsic school would be a great decision. Many new students would benefit in attending Intrinsic, because of their innovative ways of teaching.

A second local Intrinsic would be of great benefit for the city as the school would be able to better serve a larger number of students. Being able to service as many students as possible should be the main focus of all schools; Intrinsic is leading the way of the future and embracing teaching techniques that provide the students with an advantage over their peers in that they are learning on the most technological means possible.

If you have further questions feel free to reach out to me.

Thank you in anticipation,
Maria Nolasco
Administrative Assistant

To Whom It May Concern,

I would send my son to Intrinsic School because of the STEM focused opportunities available. My son is very interested in STEM related activities and academics. Ultimately, Intrinsic would be able to give my son the tools and experiences he would need to have a better chance at getting into the college and career of his choice.

Intrinsic's curriculum is STEM focused with amazing tutoring services are offered to all students. Not only is the program providing exposure of STEM to all students, they also provide the necessary tools, such as the chromebook computer at no charge to families! This allows all students to reach their highest potential regardless of income status. My son would also have the opportunity to join the Robotics Team, which is something not many schools in our area offer. This would give him the opportunity to have STEM related activities and learn to work in a team environment.

I would love for my son to attend Intrinsic Schools to be able to reap benefits of its amazing high school counselors. I have heard and seen all the wonderful success stories of children in the neighborhood going to college with scholarships because the counselors at Intrinsic worked so hard with them on getting those opportunities. I believe this would be the perfect place for my son!

Sincerely,

Maria Gonzalez

To Whom It May Concern:

I have family members who have graduated and are currently enrolled at the Intrinsic School-Belmont Campus. Watching them throughout the years and seeing how much they have grown as students and individuals has been amazing. I believe their time at Intrinsic is a reflection of how the school guides and prepares the students for the next steps after high school and for the rest of their lives. The technology, programs and clubs the school offers are all very beneficial for the students. It's important to create an environment where each student is an individual and not just "another kid". Growing up in Chicago and attending public schools, I truly believe more communities in the city need schools like Intrinsic.

I would strongly consider sending my children here when they are of age. As a parent of two boys, I want to give my children the best chances I can to set them up for a successful life. I believe Intrinsic Schools offer those opportunities for their students.

Thank you for your time,

Melissa Vega
