

Kemet Leadership Academy Charter School

Appendix 1.2 - Facilities

Detailed Space Requirements

The soon to be vacated Team Englewood section of Englewood High School consisted of 25 classrooms on three floors. In addition there was a locker room available to students, as well as changing rooms for the pool and gymnasium. Additionally students had access to the library area, lunchroom and open activity (sitting areas). There is a large entry lobby into the Team Englewood section that also included its own attendance and counseling office.

KLA anticipates being able to secure all classroom, office, and ancillary space previously provided to Team Englewood. In addition shared access to cafeteria space, gymnasium, elevators and all other common should be made available. The first year of the KLA design model will require ten traditional classroom, as well as four studio/lab rooms. Each classroom must be large enough to hold twenty-five students each. Classrooms will included electronic equipment as teaching aids. The vacated space is able to meet this requirement. The rooms, as configured will need our requirements.
